Elementary school

Noise barrier

Effective sound wall with very high noise insulation and absorption properties. Ideal for schools in residential neighbourhoods to reduce sound nuisance such as playing children or school bell.

Welded mesh - Uni ChildCare

This fully welded mesh fence is a simple yet secure perimeter protection. The vertical wires are welded into the u-profile in an off centre position reducing surface area that could be used as a grip for climbing.

Swing gate

This swing gate offers the ideal entrance method for students and teachers entering and leaving the school grounds, often in large groups. Can be locked for extra security.

Bar fencing - Tangorail

This playground railing system is made from vertical tubular bars with horizontal rails. Ideal as a child-safe system with no head, neck or finger traps. Available in various heights with choice of colours and designs.
