

TR300

Demarcation / Railing

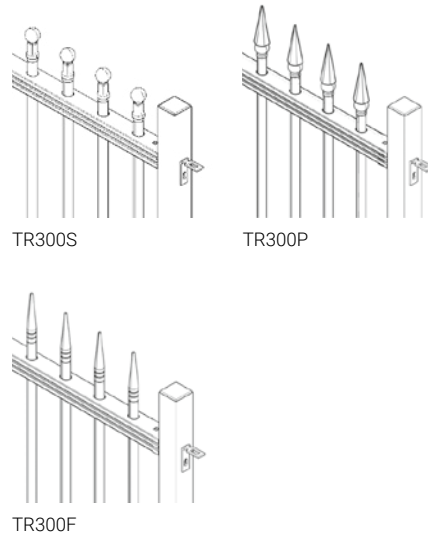

Heras Tangorail is a self-raking railing system with flexible panels that follow ground contours, providing optimum site safety and security.

Available with panel heights ranging from 1.0m up to 2.4m, the versatile TR300 system features the option of ball, point and fullered heads topping each bar to provide a visually elegant yet physically secure solution for your site. The ball topping is for heights up to 1.5 m and the point and fullered designs are for heights of 1.8 m and above.

The non-welded design allows for fast, uncomplicated installation, the TR300 comprises a hollow tube vertical bar system with top and bottom cross members, affixed between SHS posts.

- **Self-raking - no stepped panels and fewer posts**
- **Eco-friendly - no welding and low zinc content**
- **Fast installation and manufacturing**
- **Range of options for bar toppings: ball, point and fullered**
