

Heras sports fencing system

Demarcation / Welded mesh

The Heras sports fencing system means one court can be used to play a multitude of games such as football, tennis, basketball and netball.

You can also opt for a multiple Heras sports fencing system so several sports can be played safely at the same time. Here double skin fencing is used to safely separate the different playing areas.

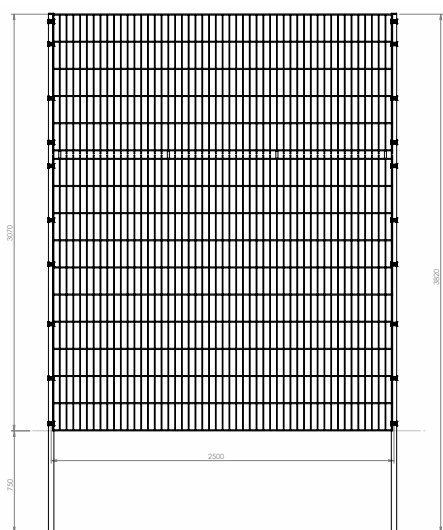

Heras sports fencing system uses plastic clips instead of metal clips between panel and post. This reduces nuisance noise to surrounding areas when a ball strikes the fence, and contributes to a more friendly and enjoyable playing experience.

Heras sports fencing system is built up in four simple steps:

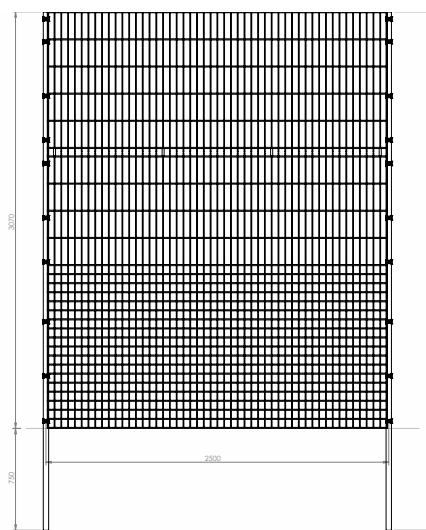

1. Choose mesh panel.
2. Choose height.
3. Choose number of gates.
4. Choose any added extras.

- **Up to 5 metre height**
- **A complete solution for every sport pitch or MUGA**
- **Low noise due to use of plastic clips between panel and post**
- **Multi mesh panel provides a strong fence especially made for small ball games**
- **Double panel allows a safe use for combined MUGA**
