

B730

Entrance control / Stadia turnstile

The B730 full height turnstile range combines entrance control with safety, stylish design, ruggedness and reliability.

Specially designed for stadium applications, the B730 is installed in numerous stadia in the UK and abroad. The B730 excels at controlling the influx of large volumes of people while conforming with all applicable safety standards.

The B730 turnstiles are available in a wide range of configurations, materials and finishes to fulfill any security, operational and aesthetic requirements. Finishes include high quality coatings in any RAL colour, together with stainless steel.

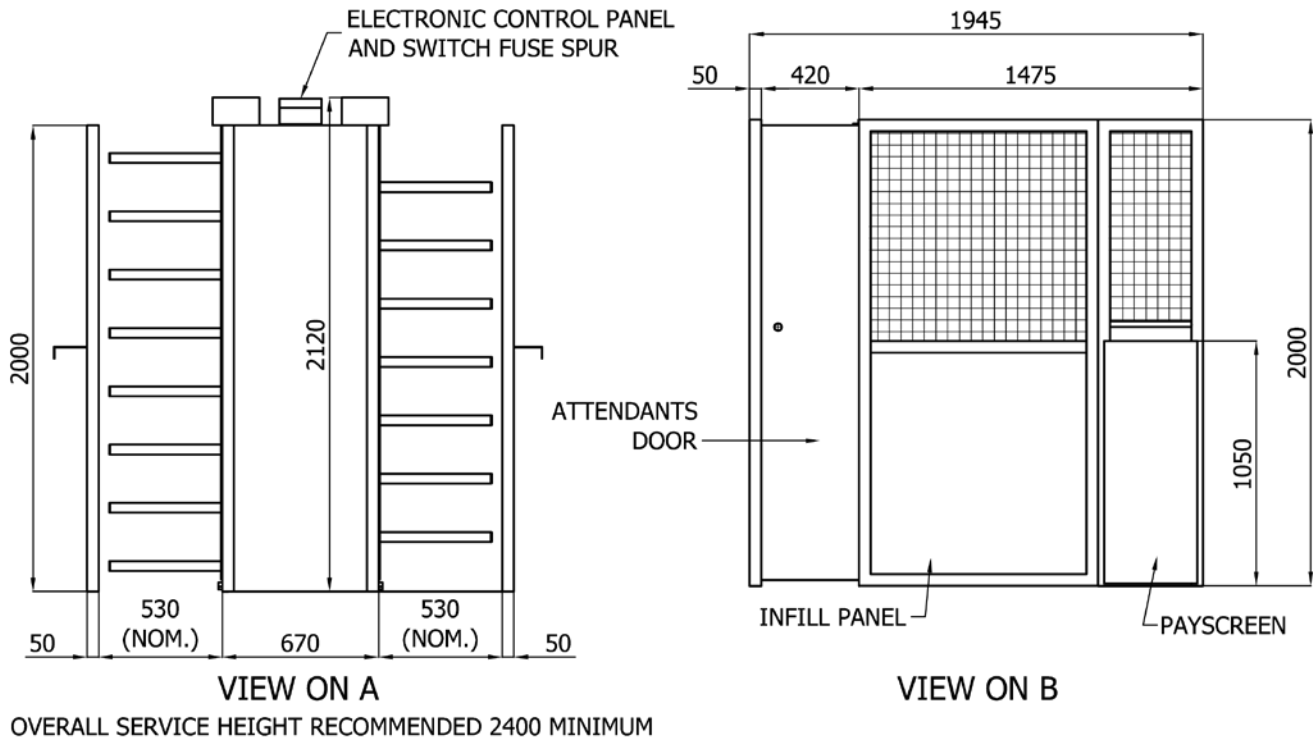

The B730 forms the basis many bespoke and specialist solutions and is fully customisable to meet and site and operation requirements.

- **Optional operator area for stadia applications**
- **Strong and durable design, effective for both supervised and unsupervised operation**
- **Reliability for stadium and sports venues**
- **Single or bi-directional electrical operation**
- **Programmable control enables integration with any access systems**

Experts in perimeter protection
