

# B801

## Entrance control / Speedwing slimlane

The B801 Speedwing slimlane regulates the flow of people in transit, combining an elegant, aesthetically pleasing design, with solid practical construction—giving customers a compact package for virtually any application.

Already installed in many office entrances, receptions, banks, airports and other prestige locations where looks as well as operation are important. The B801 Speedwing slimlane is an extremely high quality product which will give many years of reliable operation.

The designs combine attention to detail with innovation to ensure quality and reliability are built in. Quality after-sales maintenance and service support ensures long term satisfaction.
