

# Security for Schools Perimeter Protection & Entrance Control

Designed for education

Experts in perimeter protection

# Pupil & staff safety starts with a secure perimeter & access control

Heras is an European leading end-to-end supplier of permanent and mobile perimeter protection solutions. We operate in over 25 countries and employ more than 1100 highly skilled experts.

We design, manufacture, install and service temporary and permanent perimeter protection solutions for customers across business, community and industry sectors. Our aim is to be recognised as Europe's premium perimeter protection brand, proven by our reliability, commitment and expertise.

Established in 1952, Heras has successfully met and exceeded these customer safety and security needs across Europe. It is this track record, combined with the ever-developing skill set of our personnel that enables us to say that we are the experts in perimeter protection.

Having worked with many schools, colleges and universities, Heras understands the needs of the education sector and can offer a tailored solution as we design, manufacture, install and service perimeter protection solutions, providing:

- Security and protection for students, families and employees
- Controlled, hygienic and efficient flow of people in and out of the site, to reduce unnecessary contact
- Safe and easy access inclusive to those with disabilities
- Secure, separated entrances and drop off/pick up zones for pedestrians, vehicles and emergency services
- Aesthetically pleasing surrounds that can blend with the environment
- An ideal way to spend your Condition Improvement Fund (CIF)

## MUGA Sports fencing

Our MUGA (multi use games area) fencing systems are robust, secure and designed to help reduce the level of noise created when balls / sports equipment hits the fence.

## Turnstile gates

Can be tailored to size, colour, finish and usage to meet your premises security needs and operational requirements.

## Play safe bar fencing

Tangorail (TR800) play safe fence and gate solutions that are customisable in colour and manufactured to meet RoSPA expectations.

## Arm barriers

High security barriers to control the flow of traffic.

## Service and maintenance

Following the installation, Heras also offers comprehensive and tailor made service and maintenance packages. Our service solutions ensure your products remain fully compliant and in premium working order, to enable the ongoing safety and security of your premises.

## Pedestrian gates

Pedestrian gates that can be integrated with matching fence lines and motorised (with battery back up) for disability access.

## Mesh fencing

We have a range of mesh fencing options that have been designed with security and aesthetics in mind, ideal for outer perimeters.

**Our experts can help and advise on how to enhance the security of your school, simply call us on +44 808 164 2250.**

The diagram shows just a few of our demarcation and entrance control products, visit [www.heras.co.uk](http://www.heras.co.uk) for the full range.

# Bespoke perimeter protection at Chichester Free School

## The challenge:

Chichester Free School approached us to design, manufacture and install a bespoke perimeter protection system, which met the school's criteria.

## Solution:

- Secure 2.4m high outer boundary using Tangorail, a self-raking railing system
- Three gates for vehicle and pedestrian entrance and exit, enabling safe zones for drop off and pickups
- A sliding Safeglide 2 gate to allow access for deliveries and emergency vehicles
- The gate included a security rated panel of welded steel mesh for security (from opportunist vandalism etc.) and was clad with timber to help blend with the rural surroundings – making it the first of its kind
- 3 bespoke Tangorail gates within the perimeter which meet RoSPA expectations for child safety
- Secure gate with intercom access control to enable visitors to safely enter to reception and finger sensors to allow staff to pass through rapidly

## Benefits for the school:

- Student and community safety
- Prevents students running out into the road
- Allows controlled flow of people and vehicles
- Perimeter that blends in as much as possible to the school's beautiful surroundings
