

B201 SR Gate

Entrance control / Swing gates

The B201 security rated swing gate complements the A1 SR rated fencing system and offers the same protection as the fence line. The gate has been tested and accredited for A1 security rating and withstands an attack for 1 minute with tools like crowbar, screwdriver, plier etc.

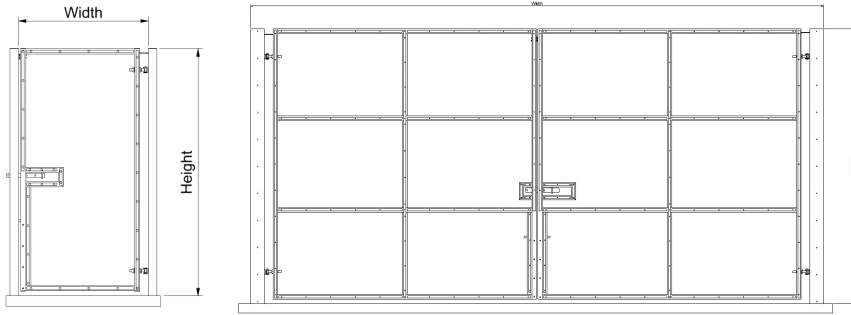

These swing gates are available in a wide range of heights up to 4.2m and widths from 1.2m to 10m. Available in single or double leaf and in two different infills (Pallas 868 double wire or Zenith 358 mesh).

The swing gate is equipped with adjustable security hinges which prevent the gate from being lifted at any point. All gates are fitted with a fall arrestor system to comply with the latest safety requirements.

Further security can be added with anti-climb devices such as spikes or razor/ barbed wire. Other system integration options include a range of detection systems and access control.

- **A1 (SR1) accredited swing gate**
- **Single or double leaf**
- **Pallas 868 double wire or Zenith 358 mesh infill**
- **Wide range of widths and heights**
- **Security hinges**
- **SR rated padlock ready (optional)**
